Seed Testing Packages

20/20 Seed Labs offers agronomic testing packages – a quick way to request a bundle of tests for general information about your seed.

The following package options fit most needs to determine general seed quality, and we can also custom-design test packages for anyone wanting more specific seed quality information.

Cereal Seed Testing Packages

Package Name	Tests Included	Options
Basic Quality A	Germination, Fusarium (DNA)	Add a true loose smut test to any package
Basic Quality B	Germination, Fusarium (plate culture)	
Standard	Germination, Fusarium (DNA), Vigour	
Premium	Germination, Fusarium (DNA), Vigour, 1,000 KW	
Professional	Germination, Fusarium (DNA), Vigour, 1,000 KW, Fungal Screen™
